Introduction

We live in a new era world. Most likely we every day coexist with digitization.

Adding to our physical world, we build online networks and we interact with people from all corners of the world.

We share our opinion and vision with everyone who will listen.

We can create entire online communities based on common interests, opinions, goals and dreams.

A new generation of tokens developed in the polygon chain and will provide a passive profit for the holder. Join our community, be a winner and a king because our investors are king.

Baby Shark is one of the community-based tokens developed in a polygon network chain. \$BSM was developed with the aim of providing an additional income for our community in the blockchain ecosystem.

Skill Marketing

As a community based project, we also want to bring people together. Some community members may not have a specific idea for a project, but they may have specific skills.

Another goal of Baby Shark is to bring people with ideas and people with needed skills to make those ideas come true together.

There will be a special room where people with special skills can advertise their abilities, or where other members need someone with Certain skills can advertise to look for them.

In addition, voting will also be an important part of the skills market, so you can choose to work only with the best.

BSM Tokens

BSM tokens will be available on Polygon Chain. The total supply is 1,000,000,000,000,000. If the supply for liquidity providers has been met 60% of the total supply, we will lock the liquidity providers for 1 year.

BSM tokens will also reduce our supply amount by 14% via token burn. To keep our token price stable.

Token Distribution

1,000,000,000,000,000 BSM tokens will be distributed as follows:

100,000,000,000,000 will be distributed to the team and marketing. Tokens will have the vesting period is 3 months after the first listing on DEX and will be released in the transaction.

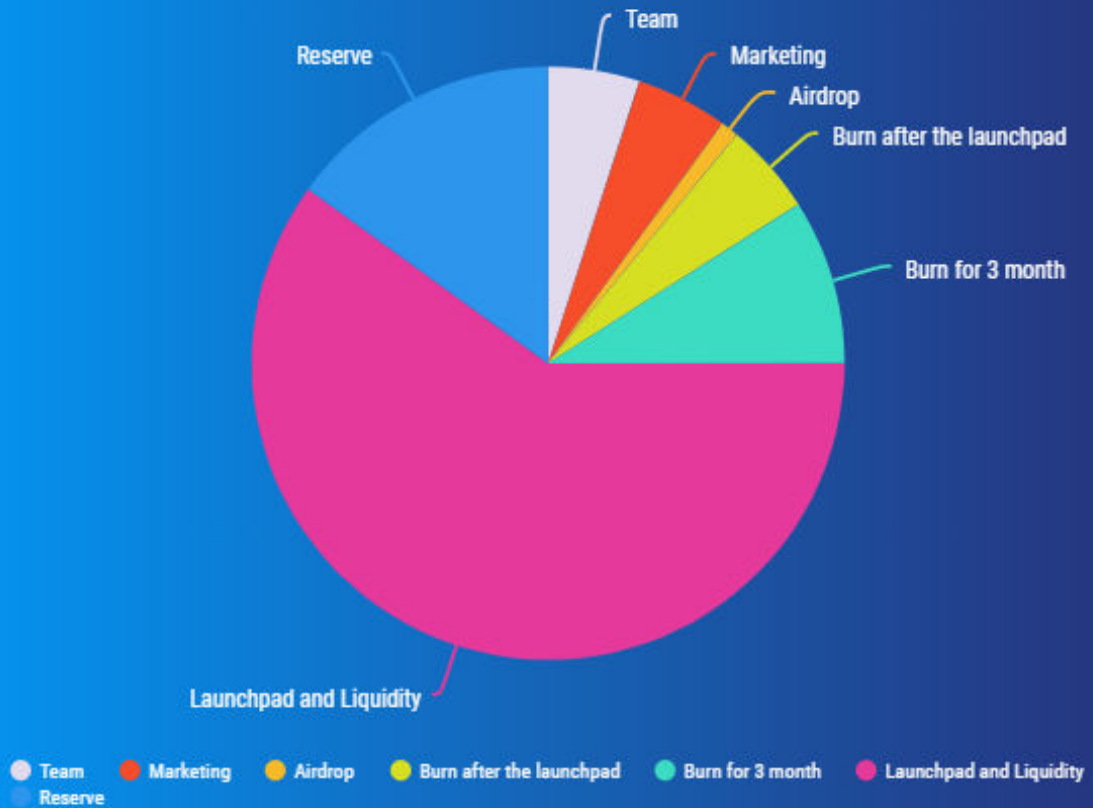

10,000,000,000,000 will be used for prizes. This could be an example. airdrops and gifts for the community competition.

In each case, these tokens flow back to the Baby Shark community.

Tokenomics

There will be an 8% buy and 9% sell tax for each transaction. This tax will be distributed as follows:
